Ancestral photography

Price list

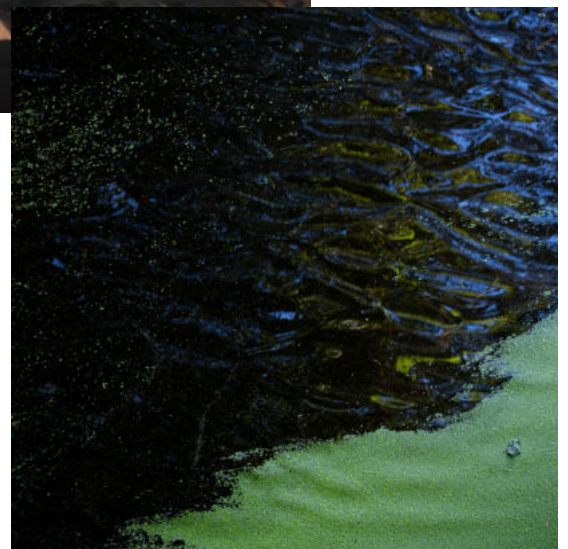

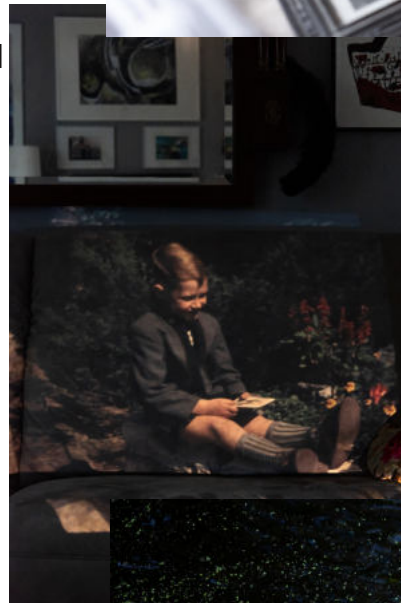

Ancestral photography is about understanding and seeing one's own history, because that is how strengthening happens from oneself and in the family.

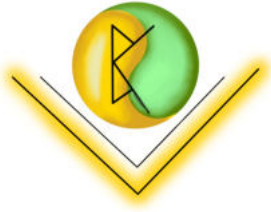

What does it take to transport and tell such an ancestral story in pictures?

For this, old documents that are still available are used to trace the history of the family, the ancestors. The places where lived are documented photographically and transported with the people through portraits in stories. Of course, the deceased are also included in the photo series. All that is needed for these stories are records, old photos, slides or other images, heirlooms or objects (don't worry, none of it will be damaged!) that will be incorporated into the series through photographic, artistic means.

How does it work?

After a few conversations, I embark on research, if necessary, and begin to photographically process the available documents, images, etc. I visit places and extract the relevant part for the family history through photography. Individual portraits of the family in question are also photographed. With all pictures I put myself into the ancestral history and transport the connections into the now through photography.

Ancestral photography

Price list

What does it cost to have the ancestral stories told photographically?

As individual and unique as each family, person and life is, the prices for such work vary. Here are some indications:

Research (if needed)

25 Euro / per hour

Daily rate photography (incl. image editing digital)

980 Euro

Portraits (incl. image editing digital, 6-10 images for download)

350 Euro

Picture book

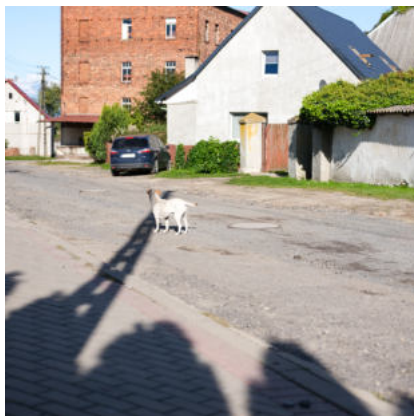

on request

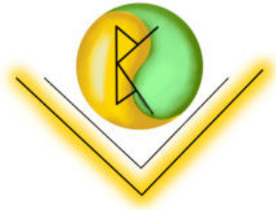

Slide show

on request

Everything else and all individual wishes can be discussed and agreed upon, so that a real complicity is created.

There are additional costs like: Travel and travel expenses (from 50 km from the city limits of Berlin, archive fees, material costs (see next page), etc., added.

Bildkomplizin - Agentur für philosophische Dokumentarfotografie

Every life is individual and needs different images, so the photographs are also individual and (almost) every wish can be addressed photographically.

All documentations and photographs can also be photographed analog (negative film). With an analog picture often a somewhat different sphere is entered, which is also possible with digital photography, but is implemented differently and more purposefully.

Price on request

What other possibilities are there?

The Polaroid, the instant photo brings moments to life and to remember in a very special artistic variant. Whoever wants such an original, can request this at any time and then it will be implemented by me.

Price on request

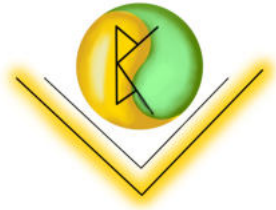

Another option is the artistic processing and editing of photographs (digital and analog). This means that photographs can be painted, embroidered or made in a certain way as a unique work of art (always in connection with the particular case)

Price on request

different sizes Fine Art Prints (framed and unframed)

price on request
